SKILL

Leadership
Critical Thinking
Collaboration
Problem-solving
Project Planning

TECH SKILL

Python, R, C++, C# & Java

Bit bucket, Git and GitHub,
Slack, Teams, Trello, Google
Workspace

NLP, Computer Vision,
Generative AI & Neural
Networks Architecture

AWS, Azure, GCP, SQL

AI Frameworks: TensorFlow,
PyTorch, and scikit-learn

Statistical Modeling &
Analysis, Flask, Fast API

EDUCATION

**M.Sc. in Artificial
Intelligence and Robotics
with Advanced Research**

University of Hertfordshire,
UK, 2025

**B.E in Computer
Engineering**

Kwame Nkrumah University
of Science and Technology.
2012

CERTIFICATIONS & TRAINING

Fundamentals of Deep
Learning, NVIDIA Deep
Learning Institute (DLI) 2025

SUMMARY

I'm a skilled AI Engineer with experience in crafting, building, and sustaining AI-driven systems using machine learning, deep learning, and software development. Proficient in Python, R, C# and C++. Experienced in optimizing algorithms, integrating AI models, and collaborating across teams to deliver innovative solutions for complex business challenges while being committed to continuous learning and innovation in the rapidly evolving field of artificial intelligence.

PROFESSIONAL EXPERIENCE

Software Engineer II Applied AI

[December 2024 - Present]

SurfGlobal Consulting, UK

- Led the development of AI-driven solutions using Azure AI Studio, including natural language processing (NLP) applications for sentiment analysis and chatbot systems, enhancing customer engagement.
- Spearheaded a team of 4 junior engineers, providing technical guidance and mentorship while collaborating with stakeholders to deliver AI projects aligned with business, resulting in a 20% increase in operational efficiency.

AI/Machine Learning Engineer

[May 2022 – June 2024]

Brooks & Bridge

- I worked on creating and deploying machine learning models with Python and AWS Sagemaker. My main focus was on using predictive analytics to help clients make sense of their unique datasets.
- I transformed our team's workflow by automating data preprocessing and model deployment pipelines. This strategic move eliminated hours of tedious manual work and enhanced our overall efficiency by an impressive 30%. With the time saved, our team could focus on strategic initiatives that drove innovation forward.

Junior Software Developer

[May 2022 – April 2023]

Sosav Nig Limited

- I built and managed backend systems with Python and .NET/C#, focusing on micro services for authentication, data processing, and reporting. These systems supported more than 50,000 monthly active users, achieving scalability and reliability through load balancing and effective resource management.
- I worked on creating and rolling out RESTful APIs that connect with MS SQL Server. By optimizing the database queries and incorporating caching strategies, I was able to cut down response times by 25%.
